

SAC2500S

SANY All Terrain Crane
250T Lifting Capacity

Max. Lifting Capacity: 250 t
Max. Boom Length: 73 m
Max. Lifting Height: 110 m

Basic performance

- Key structural components are optimized with the lifting capacity leading the products of the same tonnage.
- With the max. boom length of 73m and lifting height of 73.5m, it leads the industry.
- Seven-section boom structure and the fully optimized U-shaped high-strength structural steel boom ensure the more uniform stress and lighter weight; mounting angles of jib are 0°, 20° and 40°, which ensure fast and convenient change-over between different operating conditions so as to improve working efficiency.
- Four-wheel drive and six steering modes improve the mobility; the min. turning radius of full-wheel steering is not greater than 10m to improve the trafficability and comfortableness under the complex road conditions.

Excellent quality

- Stable and high-quality hydraulic components such as the main oil pump, main valve, winch motor, slewing motor and balance valve improve the system reliability; superior control performance is ensured through the accurate parameter matching.
- The slewing system is equipped with an integrated slewing buffer valve with free slipping function, which allows for stable slewing and control and superior micro-mobility.
- The crane instrument is integrated with an intelligently controlled integral electrical system, so that operating parameters can be controlled at any time, ensuring superior ride comfort; and meanwhile, the engine fault prompt function is provided to facilitate servicing and troubleshooting.
- Control room consists of the safety glass and corrosion-resistant steel plate, and is configured with the softened interior trim; large interior space, panoramic sunroof, adjustable seats and other user-friendly designs as well as the air conditioning and electric wiper guarantee the more comfortable and easier operation.

Energy saving and environmental protection

- Energy is saved through the hydraulic system load feedback, constant power control, dual variable-speed pump and motor.

Safe and reliable

- The torque limiter calculation system is established based on the lifting model. Through the on-line no-load calibration, the rated lifting accuracy is $\pm 5\%$, providing the all-round protection for the lifting operation. When the overload operation is performed, the system automatically provides the alarm to safeguard the operation.
- Hydraulic system is configured with the hydraulically balanced valve, overflow valve and two-way hydraulic lock etc., to ensure stable and reliable operation.
- Main and auxiliary winches are equipped with three-wrap rope protector. Boom and jib ends are equipped with height limiters respectively to prevent the overfall and overwind of wire rope.
- Length, angle and pressure sensors are configured to display the real-time operating status of crane, and automatically cut off the dangerous action and sound the buzzer.

GCP System

- The remote monitoring and management system, the first of its kind in the country, has the strong acquisition function for operating conditions and parameters, and can implement the remote fault diagnosis and management.
- Customers can monitor the operation of equipment, and query/order the accessories.

Overall Dimensions

Technical Parameters

Type	Item		Value
Dimensions	Overall length		15720 mm
	Overall width		3000 mm
	Overall height		4000 mm
	Wheel base	Wheel base – 1, 2	2750 mm
		Wheel base – 2, 3	1650 mm
		Wheel base – 3, 4	2490 mm
Wheel base –4, 5		1650 mm	
Weight	Overall weight		60000 kg
	Load	Axle load – 1, 2	12000 kg
		Axle load – 3, 4, 5	12000 kg
Power	Max. engine power		OM460LA.E3A
	Rated power		360 kW / 1800 rpm
	Rated torque		2200 kW / 1300 rpm
	Emission standard		Euro III
Traveling	Max. traveling speed		80 km/h
	Turning radius	Min. turning radius	10 m
		Min. turning radius of boom head	11 m
	Wheel mode		10 × 8
	Min. ground clearance		280 mm
	Approach angle		17°
	Departure angle		18°
	Max. gradeability		45%
	Fuel consumption per 100km		≤ 80 L
Performance specifications	Operating temperature range		– 25°C~ + 40°C
	Min. rated radius		3 m
	Tail slewing radius of turntable		4.85 m
	Boom sections		7
	Boom shape		U-shaped
	Max. lifting torque	Base boom	7420 kN·m
		Fully-extended boom	2860 kN·m
		Fully-extended boom and jib	952 kN·m
	Boom length	Base boom	13.8 m
		Fully-extended boom	73 m
		Fully-extended boom and jib	116 m
Outrigger span(Longitudinal/Transversal)		8.5 m × 8.3 m	
Mounting angle of jib		0°, 20°, 40	
Working speed	Max. single rope lifting speed of main winch (no load)		130 m/min
	Max. single rope lifting speed of main winch (full load)		45 m/min
	Max. single rope lifting speed of auxiliary winch (no load)		130 m/min
	Max. single rope lifting speed of auxiliary winch (full load)		45 m/min
	Full extension and retraction time of boom		660s / 660s
	Full lifting/descending time of boom		60s / 90 s
	Slewing speed		1.5 r/min
Air conditioning	A/C in superstructure		Cooling and Heating
	A/C in lower structure		Cooling and Heating

8	Tire	Techking
9	Piston pump	Rexroth
10	Winch motor	Rexroth\Kawasaki
11	Winch motor	Rexroth\Kawasaki

Crane Introduction

Crane frame

- Frame is of the box-shaped structure welded with the high-strength steel plates, with the strong carrying capacity.

Chassis engine

- Model: Mercedes-Benz OM460LA. E3A.
- Type: Inline six-cylinder, water cooling, supercharged and mid-cooling, diesel engine.
- Rated power: 360kw/1800r/min.
- Environmental protection: emissions as per Euro III standard.
- Effective volume of fuel tank: 500L.

Gearbox

- Gearbox: automatic transmission, with 12 forward gears and 2 reverse gears; the large speed ratio range applies to the low-speed climbing and the high-speed driving.

Axle

- Full-axle steering, driven by axles 1, 2, 4 and 5, planetary transmission with interlocking differential lock for axles 1, 2, 4 and 5, hydraulic power steering system of linkage feedback for axles 1 and 2, and electro-hydraulic control steering for axles 3, 4 and 5; the speed control assistance and optional special steering facilitate the control and steering.

Axle suspension

- All axles are equipped with the highly-adjustable oil-gas suspensions with the hydraulic lockout. Suspension height may be passively adjusted for $\pm 150\text{mm}$, with six modes such as the suspension, rigid lock, automatic leveling, overall-crane ascending and descending, single-point ascending and descending and three-axle lifting. It is able to apply to a variety of harsh conditions and road surfaces to ensure the riding comfort and ant-rollover stability.

Tire

- TECHKING as standard, BRIDGESTONE optional. Radial vacuum tires.

Brake system

- Parking brake: driven by the accumulator on the axles 2 to 5.
- Service brake: All wheels are equipped with air servo brakes and double-circuit brake system, and all wheels are equipped with drum brakes.
- Auxiliary brake: Engine is equipped with the brake, hydraulic retarder brake and exhaust brake which are able to decelerate in advance, reduce the wear and tear of brake parts and save the use of cost.

Outrigger

- H-shaped telescopic outrigger, 4-point support, vertical/horizontal span of 8.5m $\times$ 8.3m, extension and retraction of full hydraulic level vertical outrigger cylinder; automatic level adjustment.

Control system

- Modern data bus system, 24V DC power supply, one 180AH battery packs; power supply of lower structure may be cut off.
- Chassis is equipped with CAN bus system; multi-functional centralized display system; low power consumption, only 5w; four function keys in the user interface; LCD with the adjustable contrast.

Crane Introduction

Operating cab

- The ergonomic design independently developed by SANY, sliding door, safety glass, corrosion-resistant steel plate, softened interior trim, large interior space, panoramic sunroof, adjustable seats and other user-friendly designs as well as the air conditioning and electric wiper guarantee the more comfortable and easier operation; the torque limiter display achieves the organic combination of console and display system to monitor all the data of operating conditions.

Boom system

- Boom: seven sections; base boom: 13.8m; fully-extended boom: 73m; lifting height of fully-extended boom: 73.5m; U-shaped and made of high-strength welding structural steel.
- Jib: five sections, respectively 12.2m, 22m, 29m, 36m and 43m; maximum lifting height with jib: 110m; mounting angles: 0°, 20° and 40°.
- Telescopic mechanism: single-cylinder plug extension and retraction, with the full extension and retraction duration only 660S; telescopic mechanism is simple, efficient, safe and reliable.

Turntable structure

- Independently designed by SANY, the structure is more optimized and consists of fine grain high-strength steel.

Hydraulic system of superstructure

- High-quality main oil pump, slewing pump, main valve, winch motor, balance valve and other key hydraulic components are adopted to ensure the stable and reliable hydraulic system; the operating performance is improved through the accurate parameter matching; the electric proportional variable displacement piston pump is used to achieve the real-time adjustment of pump displacement to achieve the high-precision flow control through the change of electric control handle without the energy loss; the dual-pump converging/dividing main valve is independently researched and developed, with higher efficiency of single-action dual-pump convergence and better control of combined dual-pump dividing operation.
- The self-weight luffing-down compensation hydraulic system has the more superior inching performance and stability.
- Boom is provided with the single-cylinder plug extension and retraction system.
- Optional configuration jib is equipped with the luffing cylinder to achieve the stepless luffing from 0° to 40°.
- The closed-type slewing system changes the flow and direction by adjusting the angle of variable pump swash plate, ensuring the superior inching performance and smooth slewing.
- Hydraulic oil tank capacity: 900L.

Slewing system

- 360° rotation, with the maximum slewing speed of 1.5r/min; 1 closed proportional variable pump, 2 axial quantitative piston hydraulic motors; electric proportional closed hydraulic circuit and electric proportional pedal are able to achieve the emergency braking.

Hoisting mechanism

- Main winch is equipped with the electric proportional variable motor with the excellent inching performance and stability, which is able to achieve the stepless speed change and is provided with the original closed-type slewing buffering system to improve the smoothness of slewing start and braking processes and the inching performance. The diameters of wire rope of main and auxiliary winches are both 22mm, and the lengths are 340m and 280m.

Luffing mechanism

- Self-weight luffing-down is more energy efficient. Single cylinder in the front hinged support layout facilitates the luffing operation and improves the stress on the boom; with the electric proportional control balance valve, the luffing angle is from 0° to 82°.

Safety device

- Torque limiter: Based on the analytical mechanics method, the torque limiter calculation system based on the lifting force model is established. Through the on-line no-load calibration, the rated lifting accuracy is up to ±5%, providing the all-round protection for the lifting operation; in case of the overload operation, the system automatically gives alarm to provide the protection for the control operation.
- Hydraulic system is equipped with the hydraulically balanced valve, overflow valve and two-way hydraulic lock etc., to ensure stable and reliable operation.
- Main and auxiliary winches are equipped with three-wrap rope protector to prevent the overfall of wire rope.
- Boom and jib ends are equipped with height limiters respectively to prevent the overwind of wire rope.
- Boom end is equipped with an anemometer to detect whether the high altitude wind speed exceeds the allowable operating range.

Counterweight

- Movable counterweight: 80t.

Boom Operating Range
